Grabbing eyeballs at Imtex 2011, Bangalore

IMTEX metal cutting is the largest exhibition of metal-cutting machine tools and manufacturing solutions in South and South-East Asia. To keep up with the size of the stage, our stall showcased an exhaustive range of innovations and technological refinements across the complete product segment of metal cutting machines. Needless to say we were noticed...

On display were:

Single Column VMC

Tapping Center

Surface Grinder

Crimping Machine

Double Column VMC

Horizontal Boring Machine

CNC Lathe

We displayed FERMAT's Horizontal Boring Machine at Imtex. Being the tallest machine displayed there, it drew a lot of attention.

A panoramic view of our stall

The icing on the cake: our team bagged valuable orders during the exhibition.

A display within our stall highlights Electronica HiTech's association with Okuma Corporation, Japan, a world leader in machine tool manufacturing.

Reinforcing market presence

Fabtech-2011, Coimbatore

Fabtech India 2011 was an international trade fair, which was completely dedicated to Sheet Metal Processing Technologies. The event took place at CODDISIA Trade fair complex in Coimbatore.

Electronica HiTech's participation also resulted in some valuable on-the-spot orders.

Steelfab-2011, Dubai

Our principals Prima Finnpower participated in this exhibition at Dubai. Since the press brake and turret punch press were both displayed there, Electronica HiTech used this opportunity to take some clients over. The visit was fruitful and some valuable orders were received. Our customers and the Electronica and Prima Finnpower team celebrated the event by letting their hair down at the end...

Coming up soon

Look out for us at:

BLECH
India 2011

- **Date**
14th - 17th April, 2011
- **Stall nos**
D 100 & E 110
- **Venue**
Bombay Exhibition Centre,
Goregaon (East), Mumbai

BLECH India 2011 is a highly focused exhibition exclusively dedicated to sheet metal working. The event paves the way towards establishing successful business relations with customers for machine tools.

So, if you are looking for metal forming solutions par excellence, be there at our stall. On display are some machines used by leaders in the field to drive their growth and productivity plans...

Presenting your new partner in productivity

Okuma Corporation, established in 1898, is a world leader in machine tool manufacturing. Okuma lathes, machining centers and grinders are the benchmark of manufacturing quality, accuracy and reliability everywhere.

Trust all Okuma locations to provide you with the Okuma One Source technology to give your organization the

manufacturing technology that will bring your entire organization into the global competitive world.

The good news is that Electronica Hitech is the distributor and service provider of these products in India. Which means that your access to world class technology will now be much easier and faster...

- Vertical CNC Lathes
- Double Column Machining centres
- Multi Tasking Machines
- CNC Cylindrical Grinders

- Horizontal Machining Centres
- Horizontal CNC Lathes
- Vertical Machining Centres

Machines available ex-stock

Sr. No.	Machine Model Available	Delivery
1	Akyapak : Profile Bending Machine Model : APK 45	Immediate
2	Finn-Power : Hose Cutting Machine Model : Cm30	Immediate
3	Finn-power : Crimping Machines Model : 32MS (2" Crimper) Model : P51MS (4" Crimper)	Immediate
4	CSM : Tube Bending Machine Model : CNC-38, TSRJ	Immediate
5	CSM : Bar Cutting Machine Model : CT-325	Immediate
6	Hartford : Vertical Machining Center Model : LG 1000AP With Fanuc	5-May-11
7	Hartford : Vertical Machining Center Model : LG 1000AP With Mitsubishi	Immediate
8	Brother : CNC Tapping Center Model : TC R2 B	Immediate
