From the manufacturing team

NEW WORLD CLASS MANUFACTURING FACILITY

A New Beginning:

It's really a dream run when we shifted our production facility to Fursungi since August 2014. I wonder when I look back whatever we've accomplished up till now is an achievement to all of us. Since last year we have successfully integrated manufacturing of EDM, ELTURN and STABILIZER. Not only this, we've also established the manufacturing of WIRE EDM machines as per latest design

Roadmap till now:

To start with during FY 2014-15 we started new manufacturing of ELTURN-16, ELTURN-200 and Stabilizers. Along with it we've completed assembly, interfacing, & testing of WIRE EDM machines. Simultaneously, EDM team has worked upon manufacturing & testing of first prototype unit of EDM model ELTECH D300. This is the most compact ZNC model with 40A current capacity.

We've displayed the first ELTECH D300 model in IMTEX 2015 exhibition at BIEC, Bangalore with overwhelming response from the customers across INDIA. During February & March first batch of 10 machines (model ELTECH D300) were manufactured and delivered to customers across all INDIA including Delhi NCR, Ludhiana, Hyderabad, Mumbai, Pune & Gujarat.

We've also worked upon large size model which is equipped with AC servo motor for Z Axis which no other Indian EDM Manufacturer provides. We're planning to start AC servo to all customers.

At factory we also give pre-sales trials to the customers. Many of our esteemed & reputed Clients have visited our New World Class Manufacturing Facility for conducting the job trials and also to see our manufacturing set up.

Presently the factory infrastructure is fully geared up to manufacture of ZNC EDM, Wire EDM, and CNC Lathes which give best quality products for the Tool Room Industry.

Mr. Narendra Lagoo

General Manager-Operations

EVENT'S

Hartford 50th anniversary

Since 1995, Electronica HiTech has been associated with the Hartford Company in Taiwan. We are highly obliged to be a part of their successful journey and be their growth partner for India operation.

On 1st July 2015, Hartford celebrated their 50th Anniversary of their establishment. Indeed, in order to join in this grand event and be part of celebrating their success we arranged 40 customers from India. The event was gracious, informative and was appreciated by customers. All the customer could witnessed latest technology of Hartford machines and also could interact with the R& D team during the open house session.

CUSTOMER SPEAK

Thank you very much for inviting us on your parent Co's 50 the anniversary. Your hospitality was very good. We are very much impressed by your factory & manufacturing of machine. You are adopting new technology like Hart roll & Hartnet is also good. Taiwan is a very good discipline country & infrastructure was very good.

Thanx once again

For,

*Creance Equipment, Gujarat
Kamlesh Harani*

Thanks for inviting me for this function. The arrangements & planning of programme were of very systematic. Lot of efforts were taken by HARTFORD TEAM.

In celebration the prestigious doctorate is awarded by university to founder of the company,

This is a Feather on the crown of the HARTFORD.

Once again thanks to Electronica HiTech. Regards,

*Vishwanath Apte
Quality Pattern, Pune.*

New Tie-ups

Piranha's logo is known throughout the metal fabricating industry as the symbol of durable, quality-built ironworkers. Piranha equipment is simple in design, heavy in construction, and outfitted with efficient, safe operator features. Piranha ironworker tooling is to make your ironworker even more productive and flexible than you could ever imagine.

Angle Iron - Sheared, coped, notched & bent

Saddle - Sheared, punched & bump-bent

Flat Stock - Sheared & bent

Fong Ho Machinery Industry was established in 1979. Fong Ho Sawing machines can meet a wide range of customer's requirements and cut many different materials such as steel, stainless steel, copper, aluminium. It can also cut different sections like solid bars, square, rectangular & circular pipes, angles, channels etc. Here, they use circular cold saw blades(different types). They are available in manual, semi-automatic, fully-automatic and CNC configurations and all of our machines deliver high speed, low noise safe cutting for your workshop.

Types available

- CNC fully automatic with auto loader
- Semi-Automatic
- Pneumatic
- Manual

High performance Milling +High Speed Cutting

Since 1998, Quickjet started our know-how cooperation with German partner depospeed & with Tri Mill, to become the first machine factory in Taiwan that not only breakthroughs the traditional Japanese milling and machining technologies but also introduced the combination of European milling technology and professional knowledge to present our revolutionary milling concept.

PRODUCT UPDATE

5 axis machining center (5BC -X300)

The Hartford 5BC-x300 5 axis machining center builds on decades of machining excellence from the Hartford brand to deliver a next generation solution for customers in the **Aerospace component Industry**

Highlights:

- High Efficiency Solution for Aerospace Components
- Enhanced Structural Design Done in one machining
- Heavy machining with high removal rates
- Fine Finishing with excellent surface finish
- Single Set up for Molds & dies
- 5 years Warranty – linear guide way

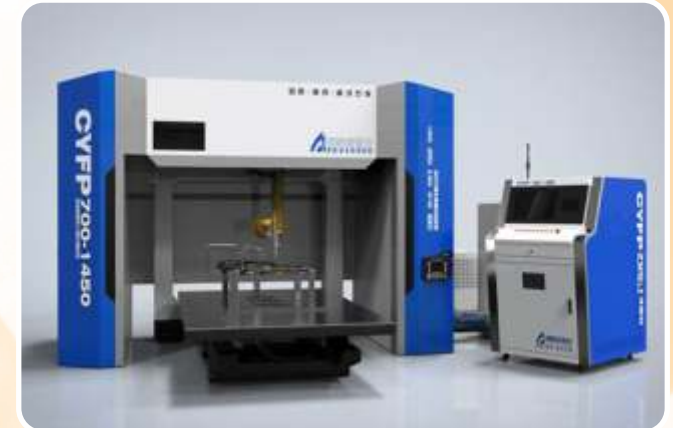

Product Update

In November 2014, CKY Company was incorporated into Jiangsu Yawei Company becoming the subsidiary that specialized in 3D and 2D fiber laser cutting sheet metal. CKY Laser manages to redefine the fiber cutting of medium power machine which will be specialized in sheet. New Standard in 2015.

- CKY optimizes the design of the system especially for the sheet metal cutting within the thickness of 3mm, and the whole machine has higher price ratio, expected to replace NCT becoming the best choice for sheet metal
- CKY fiber laser cutting machine of 1000W can catch up CO2 laser cutting machine of 2000W, and the maximum cutting speed of 700W can reach 38m/min
- CKY adopts anti-high back light path design, which can cut high reflective materials like Cu, Al and so on. The maximum cutting speed of 700W model can reach to 8m/min when cutting aluminum plate of 1mm Thickness
- CKY specializes in fiber laser cutting machine of medium power in 500W, 700W, 1000W forming a difference and complement with the parent company of high power laser cutting machine

Product Update

It's a fantastic turnaround for CSM product line during Fin Year 2014-15. The magic is continuing in this Fin year 2015-16 too. This year is very special to all of us as we are nearing to 60 machines having placed across INDIA market successfully till now.

With all the efforts from our sales team across INDIA we could be able to work in diversified business sectors like Automobile (Exhaust Components, Car Air conditioning, Car external bumpers, Engine Assembly parts), 2 wheeler Parts (handle bars, Guards, Seat support), 2 Wheeler Accessories (Vehicle External guards), Furniture (SS Handles, Railing, Elbows, Chairs). Last but not the least every sales efforts is very well supported by coordinated and directed efforts by our well trained service team across INDIA which helped us to get more & more confidence of esteemed clients like JBM-Neel Metal, SODECIA, Maflow India, Global Autotech who are vendors to OEM's like Maruti Suzuki, HONDA Motors, Ford India, Volkswagen, M & M, and Godrej. Hope to add many more customers this year also.
