Tool Master 9F

Message from the **Managing Director**

Mr. Sujit Natekar
Managing Director

Dear Business Associates,

It gives me great pleasure to reconnect with you through the revival of our quarterly newsletter. After a brief pause, we are delighted to restart this platform and share the latest developments, achievements, and milestones at Electronica Hitech Machine Tools Pvt. Ltd.

At Electronica Hiech, we believe that regular communication strengthens relationships, encourages collaboration, and keeps us aligned with our shared goals. This newsletter is not only a medium to share company updates but also an opportunity to highlight the dedication, innovation, and achievements of our team.

The past few months have brought challenges and uncertainties across global markets due to geopolitical developments. However, India has remained relatively resilient, providing a positive environment for growth and industrial development. Despite these challenges, we continue to see opportunities for growth and remain focused on supporting our customers and partners.

Our commitment to quality, customer satisfaction, technological advancement, and operational excellence remains stronger than ever. We continue to invest in innovation, strengthen our capabilities, and create long-term value for all our stakeholders. As we resume this newsletter, I would like to express my sincere gratitude to our employees, customers, suppliers, dealers, and business partners for their continued trust and support. Your confidence inspires us to move forward with renewed energy and determination.

I hope you enjoy reading this edition and would be happy to receive your feedback. Wishing you continued success and growth in the months ahead.

Warm Regards,
Sujit Natekar
Managing Director

Introducing Tool Master 9F

Bigger Capacity. Greater Precision. Smarter Performance.

Electronica Hitech proudly introduces the Tool Master 9F CNC Wire EDM, designed to meet the evolving demands of modern manufacturing. With its larger machining capacity, robust construction, and user-friendly design, it delivers high precision, improved productivity, and reliable performance.

Built to handle larger workpieces with ease, the Tool Master 9F helps manufacturers achieve greater efficiency while making the best use of valuable shop-floor space.

Tool Master 9F

New Product
Launch &
First Delivery

Key Highlights

- Large machining capacity (900 × 600 × 460 mm travel)
- Direct-coupled AC servo motors for high accuracy
- High-performance Japanese servo drives
- Fixed Table-Moving Column Design
- Granite quill and table insulation for rigidity and thermal stability
- Front-loading design with open side access for larger workpieces
- Compact footprint for efficient shop-floor use

Exhibition Highlights : Die & Mould 2026

It was a pleasure to participate in **Die & Mould India 2026** and connect with customers and industry professionals from across the country. We showcased our **EDM, WEDM, and Surface Grinder** solutions and received an encouraging response from visitors.

Thank you to everyone who visited our stall. We look forward to continuing these conversations and supporting your manufacturing journey.

Sales & Manufacturing Connect 2026

Insightful presentation

MD Address

Manufacturing Team

Recognizing Excellence

Sales & Service Team

Recognizing Excellence

Our Sales & Manufacturing Conference 2026 brought our teams together to learn, collaborate, and plan for the future. Centered around the theme **"Proactive, Unified, Customer-Centric – Winning Hitech Team,"** the conference strengthened our commitment to working together, embracing innovation, and creating greater value for our customers.

Vendor Meet 2026 : Strengthening Partnerships for Growth

At Electronica Hitech, we believe our vendors are valued partners in our growth journey.

Vendor Meet 2026 provided an excellent platform to connect with our key business partners, share future, discuss growth opportunities, and exchange valuable ideas.

The event also gave us an opportunity to recognize and appreciate the commitment and support of our vendor partners, whose contributions help us deliver quality products and solutions to our customers. We thank all our partners for their continued trust and support.

Learning & Development Sessions

Engaged & Participative Teams

Leaders

Proactive, Unified, Customer-Centric Winning Hitech Team

At Electronica Hitech, continuous learning is an integral part of our growth journey. We conducted Sales Excellence, Kaizen, and Leadership Development training sessions to enhance skills, encourage continuous improvement, and strengthen teamwork across the organization.

These interactive sessions reinforced our commitment to building a Proactive, Unified, Customer-Centric Winning Hitech Team, empowering our employees to deliver greater value to our customers.

Leadership Training

Refurbishment of Japanese CNC Wire EDM Extending Machine Life, Enhancing Productivity.

BEFORE

AFTER

Customer Challenge:

A leading tool manufacturer in Pune was facing increasing downtime on its Japanese CNC Wire Cut EDM machine, which was critical for machining large workpieces in a single setup. With the machine over 25 years old, OEM support and spare parts were no longer available, making maintenance difficult and costly.

Solution:

Electronica Hitech refurbished the machine by upgrading the controller, generator, servo motors, and key assemblies while retaining the original machine structure and footprint.

Results:

- Higher cutting speed and productivity
- Consistent machining quality with zero rejection
- Assured Service Support
- Standardized operation and maintenance
- Extended machine life without major capital investment

The successful refurbishment enabled the customer to continue utilizing a critical asset while benefiting from improved performance and dependable support

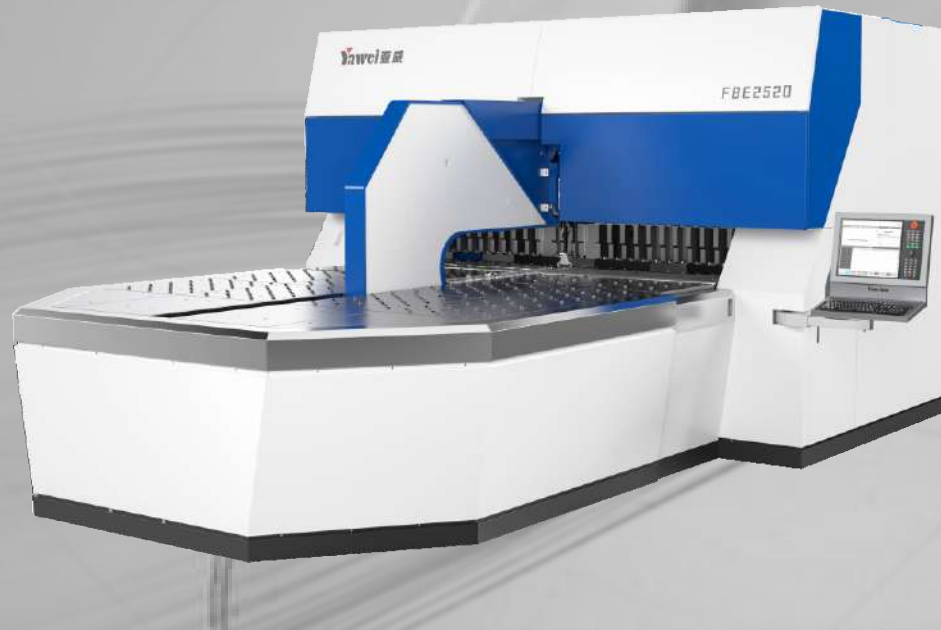

Product update: Yawei Panel Bender – Growing Presence in India

Precision Bending , Intelligent Automation

The Yawei Panel Bender is an advanced sheet metal bending solution.

Designed to deliver high productivity, precision, and flexibility. Powered by intelligent YAWEI & SIEMENS & BECKHOFF CNC controls and servo-driven technology, it minimizes manual intervention while ensuring consistent part quality.

Panel Bender

Industries Served

- Electrical Cabinets & Enclosures
- Metal Furniture
- Metal Cabinets & Storage Racks
- Kitchen Equipment
- Steel Doors
- Elevators
- Home Appliances
- EV Automotive Battery pack
- Curtain Wall Applications

Technical Details

- Max. Bending Length: Up to 4000 mm
- Max. Folding Height: Up to 300 mm
- Mild Steel Capacity: Up to 3.0 mm
- Stainless Steel Capacity: Up to 2.0 mm
- Aluminium Capacity: Up to 4.0 mm
- Automation Options: Automatic Tool Change & Robotic Loading/Unloading
- Programming Software dedicated.
